KAISER THRIVES...

why can't WE?

"I cannot take back all the years I gave Kaiser, but I can fight today to secure my pension and pass it down to my kids." Gracie Esperanza, Kaiser

While Kaiser thrives, it has left Hawaii's workers & community deprived. Kaiser is now implementing their first, worst and final with NO BACKPAY! Hawaii was offered the lowest wage increase throughout the country. Kaiser refuses to move their pension take-away proposal off the table and put our patients health at risk by cutting care & increasing workload.

Enough is enough. We are not second class. We need to stand up, be united and not divided. Join us as we take this message to the streets, to our elected leaders and our allies around the world.

Kaiser is a non-profit healthcare organization but where does their money go? Kaiser profited 8.5 million dollars and spent \$2.5 million in marketing each day, every day in 2014.

We need to impact what Kaiser cares about - its image, new young patients & profits.
